DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to a robot arm cleaning device,

Group II, claim(s) 6, and 7, drawn to a tire cleaning rotating brush,

Group III, claim(s) 8-12, drawn to vehicle bottom surface cleaner,

Group IV, claim(s) 13 and 14, drawn to a vehicle rinsing shower curtain and

Group V, claim(s) 15, drawn to a centralized control system.

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I relates to a cleaning device having a comb shaped rotating brush connected at an end of a robot arm. Group II relates to a tire cleaning device having a disc shaped brush. Group III relates to a bottom surface cleaning device that applies cleaning solution. Group IV relates to a shower curtain device including several spray nozzles. Group V relates to a centralized control system for a cleaning device.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
